

# RICARDO COSTA-TRÉ

## INTERMEDIATE SOFTWARE DEVELOPER

Benoni 1501, South Africa | [ricardo7.costatre@gmail.com](mailto:ricardo7.costatre@gmail.com) | [linkedin.com/in/costatre-ra](https://linkedin.com/in/costatre-ra)

### PROFILE

---

I am a full-stack software developer with professional experience in frontend and backend development, working primarily with Angular, C#, ASP.NET, SQL Server, and modern .NET technologies. I have contributed to the development, maintenance, and improvement of internal admin systems, API integrations, real-time services, and configurable platform features in fast-paced production environments.

My experience includes building and supporting scalable web applications, improving internal tooling, implementing backend services and controllers, working with authentication and identity systems, monitoring logs, troubleshooting live issues, and delivering fixes and enhancements across both frontend and backend systems. I have also worked on reusable component libraries, dynamic configuration systems, and real-time communication features using SignalR.

I enjoy learning new technologies, adapting quickly to new challenges, and continuously improving both my technical skills and the quality of my work. I am always willing to learn, take on new responsibilities, and grow in areas that strengthen my ability to contribute to a team. I value clean, maintainable solutions that meet current business needs while also supporting long-term scalability.

Alongside my software development career, I have a strong interest in game development, immersive systems, and interactive experiences, which continues to strengthen both my creativity and problem-solving approach.

### PROFESSIONAL EXPERIENCE

---

#### Junior Frontend Developer

Mar, 2024 - Feb, 2025

Kiron Interactive

Developed Angular admin system features, contributed to front-end and back-end Bitly API integration, helped introduce a shared component library for admin systems, and monitored logs to troubleshoot issues and deliver production fixes.

#### Junior Software Developer

Mar, 2025 - Dec, 2025

Kiron Interactive

Worked full-stack with a stronger focus on backend development, maintaining and improving internal admin systems for two projects. Built and supported a generic configuration system for customer-specific settings, implemented SignalR hubs, APIs, and controllers for real-time jackpot functionality, and gained hands-on experience with Microsoft Identity and Entity Framework Core. Completed AZ-900.

#### Intermediate Full Stack Developer

Jan, 2026 – Present

Kiron Interactive

### EDUCATION

---

#### University of the Witwatersrand

Jan, 2020 - Dec, 2022

Bachelor of Engineering Science (Digital Arts)

#### University of the Witwatersrand

Jan, 2023 - Dec, 2023

BAHons Digital Arts

### AREAS OF EXPERTISE
